聆听未闻之声

Product Brief

IM4 Open-Back In-Ear Monitor

Long-Lasting Comfort in Sound and Fit

01 \ Product Story

Thank you for being one of the first to experience IM4 — Fosi Audio's very first HiFi in-ear monitor!

Your feedback and support mark the beginning of our pursuit of pure, uncolored sound.

The IM4 marks our very first step into the world of IEMs. With it, we set out to create a product that embodies Fosi Audio's design language inside and out in both aesthetics and sound.

The name "IM4" resonates with the phrase "I am for" — a declaration of support, advocacy, and identity. It is open-ended, inviting participation and interpretation. For us, it reflects Fosi's spirit of openness, listening closely to every user's voice.

For you, it's a blank space to fill in, a way for everyone to express their own identity.

In terms of design, our team developed three artistic interpretations of the name "IM4."

After gathering votes from enthusiasts worldwide, we chose the version that resembles the letter "F" as the final logo.

The IM4 features an open-back acoustic design and a 10mm beryllium-coated diaphragm driver, delivering a spacious soundstage and rich musical detail — a true reflection of Fosi's brand spirit: "Hear the Unheard."

Our tuning team went through multiple rounds of adjustments, collecting feedback from exhibition attendees and seasoned reviewers, all to create a balanced, relaxed and versatile listening experience.

The IM4 is a milestone in our journey of earphone development — our first step, made with sincerity and care.

And this is just the beginning.

More earphones are on the way, ready to meet you.

May you enjoy it, and may it stay with you through every note.

02\ HiFi Sound

High Resolution — Hear Every Detail in Your Music

10mm PU Beryllium-coated Diaphragm

PU ensures smooth mids and punchy lows, while the beryllium coating adds clarity and sparkle to high frequencies.

N52 Dual-Magnet

A powerful, stable magnetic field improves control and speed, delivering cleaner sound with better dynamics.

Dual-Chamber Acoustic Design

The front chamber's nine-port design ensures balanced frequencies, while the rear chamber extends treble detail.

OFC Silver-Plated Cable

Braided with 4 strands of 392-core 5N high-purity OFC silver-plated wire, the cable offers excellent signal transmission and shielding for richly detailed sound.

03\ Enjoyable Listening

Effortless Acoustics with a Natural Flow

■ Open-Back Design

Minimizes internal reflections and pressure buildup, creating a more open, natural sound with reduced fatigue.

■ Acoustic Damping

The rear chamber is filled with acoustic damping material to absorb standing waves, reducing distortion and harshness.

■ Meticulous Tuning

Tuned with listener feedback to ensure smooth, balanced sound across genres—ideal for relaxed, extended sessions.

04\ Comfortable Fit

Lightweight and Adaptive for Pressure-free Wear

■ Refined Metal Finish Skin-Friendly Comfort

Crafted from CNC-machined aluminum alloy with a sandblasted and anodized finish, it offers a smooth touch that's gentle on the skin.

■ Lightweight Design Only 7g per Earbud

The hollowed structure cuts weight to just 38g with the cable, ensuring pressure-free comfort for long listening.

■ Ergonomic Shell Contoured for Ear

Developed with insights from millions of hearing-aid fitting samples, the ergonomic housing adapts to diverse ear shapes, delivering a secure and seamless fit.

05\ Swappable Components

More Personalization, More Sound Possibilities

■ Sound Nozzles

Comes with both aluminum alloy and brass nozzles. Aluminum reduces sibilance with added bass; brass enhances mids and treble with clarity.

■ Tuning Ear Tips

Includes three tuning sets — balanced, bass, and deep bass — each available in small, medium, and large sizes.

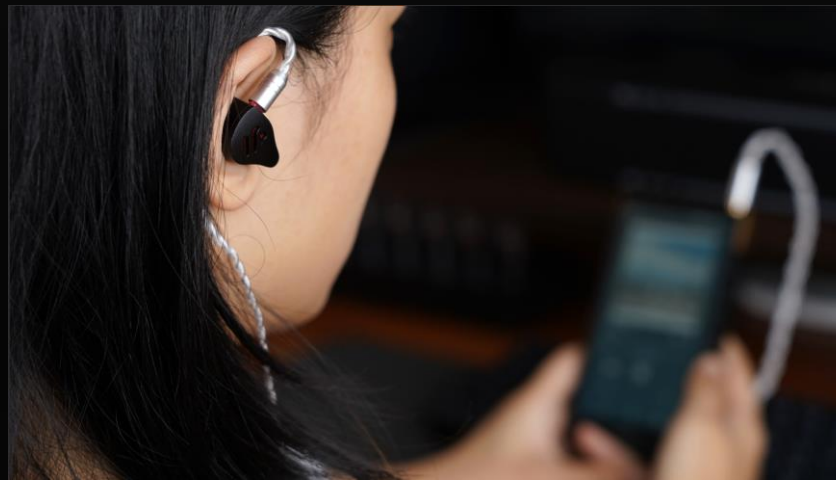

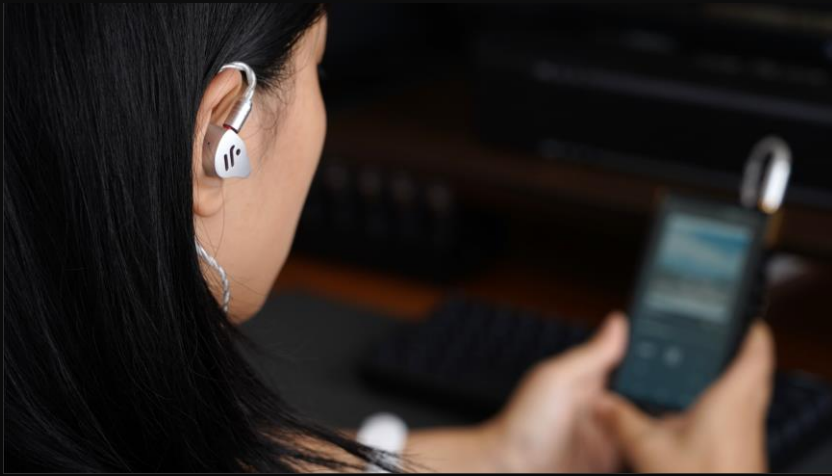

■ 2-Pin 0.78mm Cable

The detachable 2-pin design supports 3.5mm and 4.4mm cable upgrades, allowing flexible customization.

06\ Minimalist Aesthetics

Comes in Two Color Options: Black and Silver

07\ Specifications

Shell Material	6063 CNC Aluminum Alloy
Driver Unit	10 mm N52 Dual-Magnet Dual-Cavity Dynamic Driver
Diaphragm	PU Beryllium-coated Diaphragm
Sensitivity	109dB/mW
Impedance	21Ω
Frequency Response	20Hz-20kHz
Cable	4-core 392-strand 5N OFC Silver-plated Copper Cable
Connector	2-PIN 0.78mm
Audio Jack	3.5 mm Gold-plated Plug
Weight (per earbud)	7g ±0.5g
Weight (incl. cable)	38g ±1g
Price	US \$99

About Fosi Audio

Established in 2017, Fosi Audio has been committed to developing, manufacturing, and selling high-quality HiFi audio products. The brand name FOSI is shaped by four core principles:

- Foresight, thinking further ahead;
- Openness, embracing users' voices;
- Sincerity, serving you wholeheartedly;
- Innovation, upholding technical excellence. We've crafted a home and personal HiFi system—including home audio amplifiers, preamps, DACs, speakers, headphones, headphone DAC amps, etc. Fosi Audio has quickly become a rising star in the HiFi audio world, earning recognition from audiophiles globally, with a distribution network spanning over 100 countries and trusted by millions of music enthusiasts across the globe.

We believe every sound matters. With cutting-edge innovation, we make every note clear, real, and full of emotion, empowering you to “Hear the Unheard”. Driven by our mission to redefine HiFi with unmatched value, Fosi Audio continues to fuel its passion for the HiFi industry, ramp up R&D efforts, and co-create new HiFi equipment with users. We pledge to bring more amazing HiFi gear with cutting-edge technology, innovative design, and premium quality to audiophiles worldwide.
