MICRO HTS1

home theatre speaker system • owners manual

MADE IN INDIA
since 1970

INTRODUCTION

Thank you for choosing Sonodyne. By choosing the Micro HTS1, you are ensured a natural sound reproduction. The Micro HTS1 is a 5.1 home theatre speaker system with a powered subwoofer. The package consists of:

- 4 x MICRO 3001 main speakers and surround speakers
- 1 x MICRO 3002 center speaker
- 1 x ROARR 1108 powered subwoofer

For details on each product refer to the operating manual in respective cartons.

SPEAKER POSITIONING

LEFT, RIGHT CHANNEL:

- Use 2 x Micro 3001
- Ideally place them as close to your seated ear level as possible, either on a table or on the wall
- There should be 6 - 8 ft between and angled slightly toward the listening position or the sweet spot.

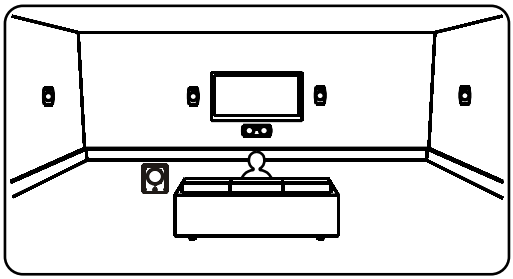

CENTRE:

- 1 x Micro 3002
- This should be kept directly below, or in front of your television
- The height should be as close to your ear level as possible
- If mounted atop the TV, please angle it towards your listening position

SURROUNDS:

- Use 2 x Micro 3001
- Place them to the sides of your listening position. If side placement is not possible, place them a few foot behind your listening position and face them forward
- Angle them so that they point towards you for the best sound. For details of mounting, please refer to the manual of Micro 3001. Experiment for best results.

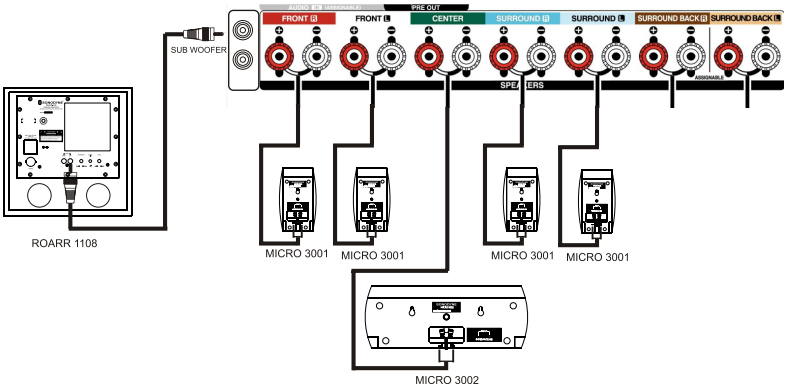

SUBWOOFER: Please refer to the Subwoofer owners' manual

5.1 CHANNEL SET-UP

CONNECTIONS

- Please connect your AV source to your AV amplifier; this could be through HDMI or optical or coaxial cables; please refer to your AVR guide for this setup
- Please connect the 4 x Micro 3001 speakers to the left, right, surround left and surround right channels and the Micro 3002 to the center channels of your AV receiver, with speaker wires, as shown in the connection diagram.
- Please ensure that the correct polarity (+ to + and – to -) is maintained between AV receiver output and speaker input while making the connections.
- Also please connect the subwoofer out of the AV receiver to either left or right input of Roarr 1108 with an RCA to RCA cable.

SET-UP

- To setup the levels, preferably through test tone, please refer to the AVR guide
- Please set the L, C, R, LS, RS channels as SMALL SPEAKERS
- Please ensure that the sound setting on your AVR is Dolby Digital / DTS / 5.1 mode (the AVR guide should serve in setting this mode)

Please make sure that post setup there is no audible distortion from any of the speakers.
