Highlight Summary

- **Multi-Function:** The MC331 is a 2.0 channel integrated amplifier with vacuum tubes and built-in DAC. It can play the roles as a DAC, preamp, and amplifier simultaneously in an audio system to meet various needs in one single device.
- **Vacuum Tubes:** 5725W Tubes help add warmth and richness to the music, which can be replaced by other 7-pin vacuum tubes to your preference. The unit also comes with 2 tube covers for protection and to avoid burns from accidental contact while the MC331 is in operation.
- **Various Inputs/Outputs:** It supports five input modes—Bluetooth, USB, Optical, Coaxial, and RCA—making it compatible with a wide range of audio source devices. Besides, it offers speaker output, 3.5mm pre-out and 3.5mm headphone output.
- **Retro Vibes:** The MC331 adds nostalgic features including the VU meter and the vacuum tubes, both providing visual pleasure. The VU meter pointer dances to the rhythm of the music, which shows signal strength in real-time and helps you adjust the volume to avoid distortion.
- **Ease of Use:** All features can be operated either via the front panel or the remote control, including power on/off, mute/unmute, play/pause, next/previous track, volume adjustment, input mode selection, Bluetooth pairing reset, bass/treble controls.
