

ROARR

The new range of Roarr subwoofers build on the decade long Roarr legacy of providing cost effective high performance subwoofers. The new range offers three models, with the largest model (1312D) sporting a 300W Class D amplifier with a 12" high excursion transducer. The other models feature 8" and 10" transducer with 100W and 150W amplification respectively. All models feature variable phase and frequency control.

With oodles of power enclosed in a sturdy, smart enclosure, the new Roarr Series will bring you a lifetime of exhilarating audio.
