Various Scenarios

Highlight Summary

- **Sim Racing:** Gamers can connect up to five bass shakers to the HT4S simultaneously, allowing for a powerful vibration contribution to the immersive gaming experience, tailored to individual preferences.
- **Patio Audio:** HT4S supports 4.1 or 5.0 channel configurations, making it highly suitable for outdoor audio scenarios. However, in such settings where the amplifier is often fixed in place and adjustments may be inconvenient, the included remote control with HT4S easily resolves this issue.
- **Tone Control:** The bass and treble controls with central detents allow users to customize their favorite sound effects to their liking. The bass gain is particularly effective in sim racing games, significantly enhancing the bass effects.
- **Multi-function:** In addition to the remote control and high-low tone adjustment, HT4S offers a subwoofer volume knob and a full-range/subwoofer switch at the bottom. On the input side, it supports Bluetooth, optical, and Aux inputs, while on the output side, it supports active/passive speakers and active/passive subwoofers. Users can assemble various suitable audio systems according to their needs.
- **Various Scenarios:** HT4S caters to a wide range of usage scenarios including home theaters, family gatherings, outdoor cafes, and lounges, thanks to its rich and flexible feature design.
